

# 50 million

## Steps Against Stigma

Epilepsy affects at least 50 million people worldwide.  
In many cases, the condition is stigmatized.

Help us to raise awareness of epilepsy stigma by  
walking 50,000,000 steps - one step for each person  
living with epilepsy - ahead of International Epilepsy  
Day, 13 February 2023.

Steps will be counted between January 9 and Monday  
February 13, 2023.
